PLANT AND SOIL

International Journal of Plant Nutrition, Plant Chemistry, Soil Microbiology and Soil-borne Plant Diseases.

Revue internationale de nutrition des plantes, de chimie végétale, de microbiologie du sol et des maladies des plantes en rapport avec le sol.

Internationale Zeitschrift für Pflanzenernährung, Pflanzenchemie, Bodenmikrobiologie und bodenbedingte Pflanzenkrankheiten.

Issued under the auspices of the

"Koninklijk Genootschap voor Landbouwwetenschap"

(Royal Netherlands Society of Agricultural Science)

Managing Editor: G. H. Arnold, Institute for Soil Fertility, Haren (Gr.), Netherlands.

Assistant Editors: J. K. Smit, Epe, and A. Houwers, Wageningen.

Druk: Koninklijke Drukkerij Van de Garde B.V., Zaltbommel

Plant and Soil

INTERNATIONAL JOURNAL OF PLANT NUTRITION,
PLANT CHEMISTRY, SOIL MICROBIOLOGY AND
SOIL-BORNE PLANT DISEASES

CONTENTS — TABLE DES MATIÉRES — INHALT

PAGE

M. S. Aulakh, G. Dew and B. R. Arora, Effect of sulphur fertilization on the nitrogen-sulphur relationships in alfalfa (*Medicago sativa* L. Pers) 75

Azmi S. Awad, David G. Edwards and Paul J. Milham, Effect of pH and phosphate on soluble soil aluminium and on growth and composition of kikuyu grass 531

Jean-René Bailly, Spectroscopies infra-rouge de quelques fractions d'acides humiques obtenues sur Sephadex 95

F. Beavington, *Short communication*, Seasonal enrichment by trace elements of kikuyu grass around heavy metals industries 283

S. K. Billore and L. P. Mall, Nutrient composition and inventory in a tropical grassland 509

Gabriel Bitton, Y. Henis and N. Lahav, Influence of clay minerals, humic acid and bacterial capsular polysaccharide on the survival of *Klebsiella aerogenes* exposed to drying and heating in soils 65

P. Bottner and F. R. Warembourg, *Short communication*, Method for simultaneous measurement of total and radioactive carbon in soils extracts and plant materials 273

M. S. Brar and G. S. Sekhon, Interaction of zinc with other micronutrient cations. I. Effect of copper on zinc^{65} absorption by wheat seedlings and its translocation within the plants 137

M. S. Brar and G. S. Sekhon, Interaction of zinc with other micronutrient cations. II. Effect of iron on zinc^{65} absorption by rice seedlings and its translocation within the plants . . 145

D. S. CHANAL, I. S. BANS and S. L. CHOPRA, *Short communication*, Degradation of alachlor [2-chloro-N-(methoxymethyl) -2', 6'-diethyl-acetanilide] by soil fungi 689

F. M. CHAUDHRY and A. WALLACE, *Short communication*. Zinc uptake by rice as effected by iron and a chelator of ferrous iron 697

A. CLÉMENT and G. JANIN, Etude comparée de la répartition des principaux cations et du phosphore dans une tige de peuplier *"Fritzi-Pauley"* 543

MARK C. COWAN, An evaluation of farmyard slurry enriched with either poultry manure of inorganic N-P-K as fertilizer for perennial ryegrass 625

A. W. S. M. VAN EGERAAT, Response of *Rhizobium* spp. and pea seedlings to glycine 191

NAND KUMAR FAGERIA, Critical P, K, Ca, and Mg contents in the tops of rice and peanut plants 421

A. H. FITTER, Effects of nutrient supply and competition from other species on root growth of *Lolium perenne* in soil . . . 177

A. A. FRANCO and J. M. VINCENT, Competition amongst rhizobial strains for the colonization and nodulation of two tropical legumes 27

A. P. GANDHI and K. V. PALIWAL, *Short communication*. Mineralization and gaseous losses of nitrogen from urea and ammonium sulphate in salt-affected soils 247

H. DE HAAN, Evidence for the induction of catechol-1,2-oxygenase by fulvic acid 129

A. T. ABDEL HAFEEZ and P. CORNILLON, Effects of irrigation rhytmh on growth, fruit-set, yield and quality of egg plant (*Solanum melongena*) in southern France 213

B. L. HAINES and G. R. BEST, *Short communication. Glomus mosseae*, endomycorrhizal with *Liquidambar styraciflua* L. seedlings retards NO_3, NO_2 and NH_4 nitrogen loss from a temperate forest soil 257

R. J. HANCE, *Short communication.* Herbicide usage and soil properties 291

R. K. M. HAY, *Short communication. "Doubling back"* of mechanically impeded barley roots 307

N. A. HEGAZI and S. LEITGEB, Azotobacter bacteriophages in Chechoslovakian soils 379

I. C. R. HOLFORD, Effects of phosphate buffer capacity of soil on the phosphate requirements of plants 433

J. G. IYER and K. E. WOJAHN, *Short communication.* Effect of the fumigant Dazomet on the development of mycorrhizae and growth of nursery stock 263

M. A. KAUSAR, F. M. CHAUDHRY, A. RASHID, A. LATIF and S. M. ALAM, Micro-nutrient availability to cereals from calcareous soils. I. Comparative Zn and Cu deficiency and their mutual interaction in rice and wheat 397

M. ISHAG, M. AJMAL KHON and TAHIRA KHIZAR, *Short communication.* Plant growth regulators from species differing in salt tolerance as effected by soil salinity 267

E. T. KORNEGAY, J. D. HEDGES, D. C. MARTENS and C. Y. KRAMER, Effect on soil and plant mineral levels following application of manure of different copper contents 151

B. KUMAR, M. S. GANGWAR and V. S. RATHORE, Effect of dimethyl sulfoxide (DMSO) on zinc availability (L-value), growth and metabolic activities of rice plants 235

D. LAMB, Variations in the foliar concentrations of macro and micro elements in a fast growing tropical eucalypt 477

W. M. LANGILLE and K. S. MACLEAN, Some essential nutrient elements in forest plants as related to species, plant part, season and location 17

A. A. LEPIDI, M. P. NUTI, G. BERNACCHI and RACHELE NEGLIA, Physiology of the Rhizobium-legume association: I – The presence of bacterial DNA within the plant root . . 555

H. LORENZ, Free amino acids in tomato plants in relation to form and concentration of nitrogen in the rooting medium . 163

H. Lorenz, Nitrate, ammonium and amino acids in the bleeding sap of tomato plants in relation to form and concentration in the medium 169

Shankar Maloth and Rajendra Prasad, *Short communication.* Relative efficiency of rock phosphate and superphosphate of cowpea (*Vigna sinensis* Savi) fodder 295

P. B. May and L. A. Douglas, *Short communication.* Assay for soil urease activity 301

F. R. Minchin and R. J. Summerfield, Symbiotic nitrogen fixation and vegetative growth of cowpea (*Vigna unguiculata* (L.) Walp.) in waterlogged conditions 113

S. G. Misra and Girish Pandley, *Short communication.* Evaluation of suitable extractant for available lead in soils 693

D. N. Munns and R. L. Fox, *Short communication.* Depression of legume growth by liming 701

K. Natarajan, *Short communication.* A simple device to study the role of seed mycoflora in the root region of crop plants . 287

Niels Erik Nielsen, A transport kinetic concept for ion uptake by plants. III. Test of the concept by results from water culture and pot experiments 659

Niels Erik Nielsen, The effect of plants on the copper concentration in the soil solution 679

Jens Møller Nielsen and Bodil Friis-Nielsen, Evaluation and control of the nutrititonal status of cereals. I. Dry matter weight level 317

Jens Møller Nielsen and Bodil Friis-Nielsen, Evaluation and control of the nutritional status of cereals. II. Pure-effect of a nutrient 339

Jens Møller Nielsen and Bodil Friis-Nielsen, Evaluation and control of the nutritional status of cereals. III. Methods of diagnosis and yield prognosis 647

Hans Nommik, *Short communication.* Further observations on ammonia loss from urea applied to forest soil with special reference to the effect of pellet size 279

OLLE PETTERSON, Heavy metal ion optake by plants from nutrient solutions with metal ion, plant species and growth period varitions 445

K. PLANQUÉ and A. A. N. VAN BRUSSEL, *Short communication.* An improved large-scale isolation procedure for bacteroids of *Rhizobium leguminosarum* Frank. from *Pisum sativum* L. 309

M. E. PROBERT, Studies of available and isotopically exchangeable sulphur in some North Queensland soils . . . 461

B. F. QUIN and J. H. HOGLUND, The effects of tungstate and nitrogen source on the dry weight and nitrogen yields, and molybdenum and tungsten content, of white clover (*Trifolium repens*) 201

RAHMATULLAH, F. M. CHAUDRY and A. RASHID, Micronutrient availability to cerals from calcareous soils. II. Effect of flooding on electrochemical properties of soils . . 411

D. B. RALSTON and R. P. MCBRIDE, Interaction of mineral phosphate-dissolving microbes with red pine seedlings . . . 493

A. RASHID, F. M. CHAUDHRY and M. SHARIF, Micronutrient availability to cereals from calcareous soils. III. Zinc absorption by rice and its inhibition by important ions of submerged soils 613

H. N. SHAHI, Studies on the rates of water use of dwarf wheat and their relationship with potential values based on the climatological approach 57

KHALID HAMID SHEIKH and SAMEEHA KHANUM, Some studies of the quality of irrigation water and the germination and growth of wheat at different concentrations of boron 565

H. B. SO, L. A. G. AYLMORE and J. P. QUIRK, Measurement of water fluxes and potentials in a single root-soil system. I. The tensiometer-potometer system 577

J. D. TJEPKEMA and R. H. BURRIS, Nitrogenase activity associated with some Wisconsin prairie grasses 81

P. G. Tow and G. J. White, Non-symbiotic nitrogen fixation in the rhizosphere of *Digitaria smutzii* Stent 637

F. T. Turner and J. W. Gilliam, Effect of moisture and oxidation status of alkaline rice soils on the adsorption of soil phosphorus by an anion resin. 353

F. T. Turner and J. W. Gilliam, Increased P diffusion as an explanation of increased P availability in flooded rice soils . 365

B. Venkateswarlu, P. Koteswara Rao and A. V. Rao, Canopy analysis on the relationships between leaf area index and productivity in lowland rice, *Oryza sativa* L. 49

D. Walmsley and I. T. Twyford, The mineral composition of the Robusta banana plant. V. Sulphur, iron, manganese, boron, zinc, copper, sodium and aluminium 595

R. E. White, L. O. Tiffin and A. W. Taylor, The existence of polymeric complexes in dilute solutions of aluminium and orthophosphate 521

Phaik Y. Yao and J. M. Vincent, Factors responsible for the curling and branching of clover root hairs by rhizobium . . 1

Suda Yimprasert, R. L. Blevins and Somsak Chaewsamoot, Movement of nitrate, chloride, and potassium in a sandy loam soil 227
